Prajwal Allayyanavar

Karnataka, India | +91-9008341720 | allayyanavarprajwal@gmail.com | LinkedIn | Portfolio | Open to Rotational Shifts and Relocation

Professional Summary

SOC Analyst with experience in Microsoft Sentinel, KQL, Microsoft Defender for Endpoint, incident response, threat hunting, SIEM tuning, and security monitoring. Investigated 100+ security alerts and incidents involving authentication, endpoint, email, malware, and phishing activity. Experienced in KQL detection rules, Entra ID and endpoint log analysis, incident investigation, and NIST CSF-aligned response procedures. Currently serving as Team Lead supporting SOC operations and incident escalations. Microsoft Certified: Security Operations Analyst Associate (SC-200).

Skills & Certifications

SIEM & Security Tools: Microsoft Sentinel, Splunk, Elastic Stack (ELK), Microsoft Defender for Endpoint, Wireshark, Nmap, Nessus, Burp Suite, ServiceNow
SOC Skills: Alert Triage, Incident Response, Threat Hunting, SIEM Tuning, Detection Engineering, Vulnerability Management, Malware Analysis, Threat Intelligence
Microsoft Security: Microsoft Sentinel, KQL, Microsoft Defender for Endpoint, Microsoft Entra ID, Microsoft 365 Security
Networking: TCP/IP, DNS, Firewall, VPN, IDS/IPS, Network Traffic Analysis
Programming: Python
Platforms: Windows Server, Active Directory, Linux, Microsoft Azure
Certifications: Microsoft Certified: Security Operations Analyst Associate (SC-200), Certified Network Security Practitioner (CNSP)
CTF & Labs: TryHackMe – Top 1% globally, 300+ rooms completed

Work Experience

SOC Analyst Jan 2026 – Present
Vandyam Solutions Pvt Ltd *Belagavi, Karnataka*

- Triaged and investigated security alerts in Microsoft Sentinel using KQL, analysing authentication, endpoint, email, and audit logs to determine severity, identify root cause, and document response actions.
- Investigated 100+ security alerts and incidents, correlating Microsoft Sentinel, Microsoft Entra ID, Defender for Endpoint, and threat intelligence data to identify suspicious authentication activity, malware, phishing, and account compromise.
- Investigated phishing and malware alerts using Microsoft Defender for Endpoint, analysing endpoint telemetry, validating threats, tracking remediation actions, and supporting vulnerability management.
- Authored 15+ incident response playbooks and operational runbooks aligned with NIST CSF, covering alert investigation, escalation, containment, and incident documentation.
- Serve as Team Lead for day-to-day operations, supporting analyst activities, incident escalations, investigation reviews, and monitoring procedures.
- Supported Enterprise Monitoring Service operations by monitoring and investigating security and infrastructure events across customer environments using Microsoft Sentinel, Datto RMM, PRTG Network Monitor, and Defender for Endpoint.
- Built a multi-source alert correlation workflow processing 4,000–5,000 events across 7 days, grouping related events using hostname and time-based correlation to identify recurring security and infrastructure events.
- Contributed to a centralised Grafana monitoring dashboard providing a consolidated view of security alerts and infrastructure status across monitoring platforms and customer sites.

Projects

Executive Account Takeover Investigation | *Microsoft Sentinel, KQL, Entra ID*

- Investigated a suspected executive account compromise by analysing Entra ID sign-in and audit logs in Microsoft Sentinel, identifying password-spray attempts and the successful account compromise.
- Identified an unauthorised MFA method and inbox rule used to hide finance-related emails and performed tenant-wide checks for related suspicious activity.
- Documented the investigation timeline, evidence, affected accounts, and containment actions including session revocation, password reset, MFA removal, inbox-rule removal, and source-IP blocking.

Active Directory Security Lab | *Windows Server, Kali Linux, Windows 10*

- Configured an Active Directory lab and simulated LLMNR poisoning and NTLMv2 hash cracking to analyse credential exposure, Windows event logs, detection opportunities, and defensive controls.

Education

KLS Gogte Institute of Technology Belagavi, India
Master of Computer Applications (MCA) – GPA: 8.17/10 *Feb 2024 – Aug 2025*
